

WMS订单未找到

1.确认订单所在的仓,如奉贤-成品仓、奉贤-物料仓、奉贤-返工仓

2.可能是SAP数据未同步,请咨询IT

The screenshot shows the TTR Technology IT & Service WMS system. The left sidebar has a dark theme with white text. The main area is titled "Outbound Order" (出库单). It includes a search bar with fields for item number, processing type, category, sales organization, customer number, receiver, and more. Below the search bar is a table with columns: #, Outbound Order Number, Outbound Type, Customer Name, Brand, Processing Type, Category, Sales Organization, Delivery Number, Total Quantity, Failure Reason, Required Delivery Date, and Customer Address. The table displays a message: "没有要显示的项目" (No items to display). At the bottom, it shows "总计: 0 已选: 0" (Total: 0 Selected: 0) and a page number "1". On the right, there are buttons for "Search", "Print", "Export", "Import", and "Print Labels". The footer of the main window says "50 | 100 | 所有" (50 | 100 | All).
